

Jahez Foundation

Building institutional impact through social entrepreneurship

Jahez Foundation was established as the Group’s dedicated platform for corporate social responsibility, anchored in a long-term commitment to social entrepreneurship and community-led value creation. Aligned with Jahez Group’s strategic priorities, the Foundation focuses on nurturing innovation, enabling entrepreneurial solutions and supporting initiatives that deliver measurable social outcomes. Its mandate extends beyond funding to include business advisory support, capability building and public awareness initiatives that strengthen the social enterprise ecosystem and empower both individuals and institutions.

The year 2025 marked a defining phase in the Foundation’s development, transitioning from establishment to execution. During this period, Jahez Foundation launched its first portfolio of initiatives, overcoming early-stage challenges and laying the groundwork for sustainable, scalable impact. A flagship collaboration was delivered through support for the Jood Al Easkan Initiative, enabling rental assistance for financially distressed families and helping vulnerable households secure stable housing. The initiative contributed directly to improved living conditions and reinforced the Foundation’s focus on housing stability as a core social priority.

Jahez Foundation also deepened its engagement in disability support through a partnership with the Children with Disability Association. The collaboration delivered rehabilitation and physical therapy sessions designed to enhance independence and quality of life, alongside educational programs supporting learning and cognitive development. Contributions from Jahez customers exceeded ₪ 250 thousand, providing meaningful, direct support to beneficiaries and underscoring the role of community participation in driving impact.

Strategic partnerships formed a central pillar of the Foundation’s operating model throughout the year. Collaborations with local and international organizations expanded outreach, strengthened delivery capacity and enabled the launch of initiatives that promote innovation and entrepreneurship across sectors. The Foundation continued its partnership with Ehsan, through which Jahez customers contributed more than ₪ 5.45 million in 2025. These funds supported a broad range of causes, including healthcare, mosques, endowments and essential social services for those in need.

Further expanding structured giving channels, Jahez Foundation partnered with the Kingdom of Saudi Arabia Project for the Utilization of Hady and Adahi to introduce Udhiya and Sadaqah services under the Jahez IlKhair category. The initiative simplified the donation process and generated contributions exceeding ₪ 1.3 million, reflecting strong engagement and trust in the platform. In parallel, more than 1.25 million bottles of water were distributed through the Saqya Al-Maa initiative under Jahez IlKhair, delivered in collaboration with the Saudi Food Bank, addressing essential needs and reinforcing food and water security efforts.

The Foundation’s growing impact was recognized during the year through several honors from respected institutions. In 2025, Ekhaa recognized Jahez Foundation for its contribution to providing housing units for orphans and for its continued support of the organization’s programs through the Jahez IlKhair initiative.

Looking ahead to 2026, Jahez Foundation aims to expand its impact by advancing industrial and mining-focused entrepreneurship within the non-profit sector. The Foundation will prioritize facilitating secure and efficient donations to licensed non-profit organizations, promoting innovation and technology adoption, and supporting the development of national talent. Its efforts will include specialized training and capacity-building programs, incubation and acceleration of industrial and mining initiatives, and the provision of technical and advisory services. Through business analysis, value chain studies and strategic partnerships, the Foundation seeks to enable sustainable projects that strengthen the competitiveness of national products and contribute to long-term economic and social development.

Jahez Foundation launched its first portfolio of initiatives, overcoming early-stage challenges and laying the groundwork for sustainable, scalable impact.
